Application summary sheet for Master's Programme in Chemistry - Biochemistry

The purpose of this form is to facilitate the University's assessment of your qualifications for eligibility and selection for the programme. Upload this document with the rest of your application on www.universityadmissions.se. This form does not replace the transcript of records in your application.

Requirements

In addition to the general requirements (a Bachelor's degree and English language proficiency), you need to fulfil the specific requirements, that is:

- 90 credits in chemistry and biology;
- 60 of these 90 credits must be in chemistry, and should include
- at least 10 credits in biochemistry.

Credits

The credit system refers to the European Credit Transfer System (ECTS). If your university uses a different credit system and does not provide a conversion between your local credits and ECTS credits, then we ask you to calculate a conversion considering that 60 ECTS credits correspond to a full year of study. Knowing the total number of credits needed to get a degree in your system and the duration of the degree (number of years) you can estimate the conversion factor (CF) as follows:

$$CF = \frac{\text{number of years} * 60}{\text{total credits}}$$

For example, if your 3-year Bachelor degree corresponds to 120 credits in your system, then:

$$CF = \frac{3 * 60}{120} = 1.5$$

This means that a 4 credit course in your system corresponds to $4 \times CF = 6$ ECTS credits. Please also note that, the purpose of this form is to determine whether the requirement of 10 credits in biochemistry is met. Sometimes a part of a course is biochemistry, but not the whole course (e.g. molecular cell biology). These credits count, but if you need to rely on such credits to satisfy the requirement, it is strongly recommended that you submit the course syllabus.

Identification

First Name	Last Name
Application Number	

Required credits

Instructions for filling in the following table:

- If only part of a course is in biochemistry, indicate only those credits in columns “local” and “ECTS” and mark column (a) with X.
- If a course is ongoing (not yet completed) mark column (b) with an X.

Credits in biochemistry
