My goal is to **strengthen emergency care through collaborative, research driven practice**. I focus on accessible, evidence based, interprofessional emergency care supported by safe, sustainable learning environments and a global, patient centered point of care approach. My professional path reflects this ambition and my commitment to ongoing development.

Research and academic activity related to Emergency Medicine:

FACE-CAG Project on Biomarkers in Peripheral Nerve Palsy in a Clinical Academic Group with Clin. Neurophysiology UU 2025
Mi-AF International collaboration on Biomarkers and imaging with MRI on patients with Atrial Fibrillation 2025
SVAR (Svenskt Akutvårdsregister)/**ANSWER** (A National Swedish Emergency Registry) **National Boardmember** 2024
FAST-CCTA (co PI) UUH multicenter international study; coronary CT for intermediate risk chestpain pts. 2023-25
EmergAI ED Patient registration of symptoms and risk prediction with Artificial Intelligence/MachineLearning. 2023
PI Evaluation of AQT90FLEX Ddimer analysis sensitivity and specificity for diagnosis of thrombosis. Radiometer, DK.2021-23
Faculty of the Research Committee SWESEM (Swedish Society of Emergency Medicine) 2014-2020
Reviewer, Upsala Journal of Medical Sciences, since 2015
BEEM (Best Evidence in Emergency Medicine) **rater** (peer-reviewing, research in Emergency Medicine) 2014
Editorial Board Member, International Journal of Emergency Medicine (IJEM) since 2014. Reviewer since 2013
Formally Accredited Supervisor for PhD Students Uppsala University **2013 and 2023**
Research mentor, Medical Students project in Emergency Medicine (SSA, T10 Läkarprogrammet UU) 2012-ongoing

PhD (Doctor of Medical Sciences) 2010 Uppsala University, Sweden

Title "**Brachial Artery Hyperemic Blood Flow Velocity**" Department of Medical Sciences, Uppsala University
Main Supervisors: Professor Lars Lind, Uppsala University and Ass. Professor Johan Sundström, UU. Opponent: Professor Peter Friberg, Sahlgrenska University Hospital, Gothenburg, Sweden

Published Research:

1. Hyperemic blood flow velocities in systole and diastole relate to coronary risk in different ways. (Järhult, Hall, Lind. *Journal of Clinical Physiology* 2008)
2. Brachial artery hyperemic blood flow velocities are related to carotid atherosclerosis. (Järhult, Sundström, Lind. *Journal of Clinical Physiology* 2009)
3. Brachial artery hyperemic blood flow velocity and left ventricular geometry. (Järhult, Sundström, Lind. *Journal of Human Hypertension* 2010)
4. Brachial artery hyperemic blood flow velocity in relation to established indices of vascular function and global atherosclerosis. (Järhult, Hansen, Ahlgren, Johansson, Sundström, Lind. *Clinical Physiology and functional imaging* 2011)
5. Implementation of a Rapid, Protocol-based TIA Management Pathway. Jarhult SJ, Howell ML, Barnaure-Nachbar I, Chang Y, White BA, Amatangelo M, Brown DF, Singhal AB, Schwamm LH, Silverman SB, Goldstein JN. *West J Emerg Med.* 2018 Mar;19(2):216-223.
6. Performance of a Hospital Pathway for Patients with a New Single Brain Mass. Arrillaga-Romany I, Curry WT Jr, Jordan JT, Cahill DP, Nahed BV, Martuza RL, Loeffler JS, Järhult SJ, Muzikansky A, Cohen AB, Singhal AB, Goldstein JN, Batchelor TT. *J Oncol Pract.* 2019 Mar;15(3):e211-e218.
7. Risk factors for the absence of diagnosis of asthma despite disease symptoms. Results from the Swedish GA2LEN study. (Kisiel MA, Jacobsson M, Järhult S, Ekerljung L, Alving K, Middelveld R, Franklin K, Janson C. *J Asthma Allergy* 2022;15: 179–186).
8. Medical students experience mistreatment, with a focus on gender discrimination. Cross-sectional study at one Swedish medical school *Cogent Social Sciences* <https://doi.org/10.1080/23311886.2023.2278245>
