**UPPSALA 1996**

Distributor: Botanical Museum, Uppsala University

**THUNBERGIA** is the continuation of 'Publications from the Herbarium, University of Uppsala', of which 19 numbers were issued between 1978 and 1986. The name is given in memory of Carl Peter Thunberg (1743–1828), a disciple of Linnaeus and a famous traveller to South Africa and Japan. His collections, about twentyseven thousand sheets, were transferred to our University in 1785, and became the foundation of the Botanical Museum. Thunberg succeeded Linnaeus filius as professor in 1785 and held the professorship to his death.

Thunbergia is issued irregularly and distributed on exchange basis or by order to the address below.

Contributions are refereed by external specialists.

## Caliciales Exsiccatae. Fascicle 10

Leif Tibell

Tibell, L. 1996. Caliciales exsiccatae. Fasc. 10 (Nos 226–250).  
Thunbergia 23: 1–9. ISSN-0283-2275.

The 10th fascicle mainly contains material from Asia and the Southern Hemisphere, with 7 species of *Bunodophoron* and 6 species of *Chaenothecopsis* being included. *Chaenotheca sphaerocephala* is reported new to Australasia. Isotypes of *Bunodophoron agnetae*, *Chaenothecopsis amurensis*, *C. asperopoda*, *C. irregularis* and *C. ussuriensis* are distributed.

L. Tibell, Institute of Systematic Botany, Uppsala University, Villav. 6,  
S-752 36 Uppsala, Sweden.
